

AUTOPILOT®

SALT CHLORINE GENERATORS

In production since 1976, AutoPilot® Salt Chlorine Generator units have been proven over time. With over a half million satisfied customers worldwide, only AutoPilot® offers you the combination of quality, dependability, customer satisfaction and warranty... insist on the BEST... the ORIGINAL, AUTOPILOT®.

AutoPilot® has been the technological leader in the chlorine generation process for swimming pools for many years. AutoPilot® sets the standard for reliability, features and performance... and has a unit to fit every need and budget.

Salt chlorine generators produce a constant low level of chlorine right in the pool's plumbing. This creates superior water quality and drastically reduces the need to monitor and add other balancing and maintenance chemicals. AutoPilot® offers a wide range of product line, from a simple unit for aboveground pools, to the most technologically advanced Digital unit, to a combination unit that marries the power of Ozone with the convenience of salt chlorine generation. AutoPilot® even offers a modular commercial unit for larger applications.

Pool Pilot® Eco Nano

Designed for small residential pools with two-digit display and inline cell with flow switch.

Pool Pilot® Digital Nano

Designed for small residential pools and packed with features, plus an easy-to-read digital display.

Pool Pilot® Digital Nano+

Same great technology as the Nano, with increased output, this unit is ideal for small or medium residential pools.

Pool Pilot® Soft Touch

Designed to fit most residential pool sizes, this unit uses touch pads instead of a digital display. Saving money without sacrificing performance.

Pool Pilot® Digital

Our flagship salt chlorine generator, with thousands installed all over the world. This unit has it all, including a digital display in five languages. Powerful enough for any residential pool.

Pool Pilot® PCC

For easy water quality management, this Nano system will automatically measure, dose and control the sanitizer and pH levels. Includes a peristaltic pump for acid feeding.

CoPilot®

Powerful hybrid of ozone and salt chlorine generation makes light work of sanitizing any pool. Ozone reduces the chlorine demand and prolongs the life of the cell. Your choice for the best water quality.

Digital/Soft Touch Combo

Our combo system is designed for both larger residential and semi-commercial pools where up to two commercial grade cells may be required. Simple, cost effective and highly efficient.

Pool Pilot® Professional

Our largest system, capable of handling virtually any body of water. With up to six commercial cells per system and easily installed in multiples, this is the choice for commercial pools, water parks, competition pools and other large-scale projects.

How a Salt Chlorine Generator Works?

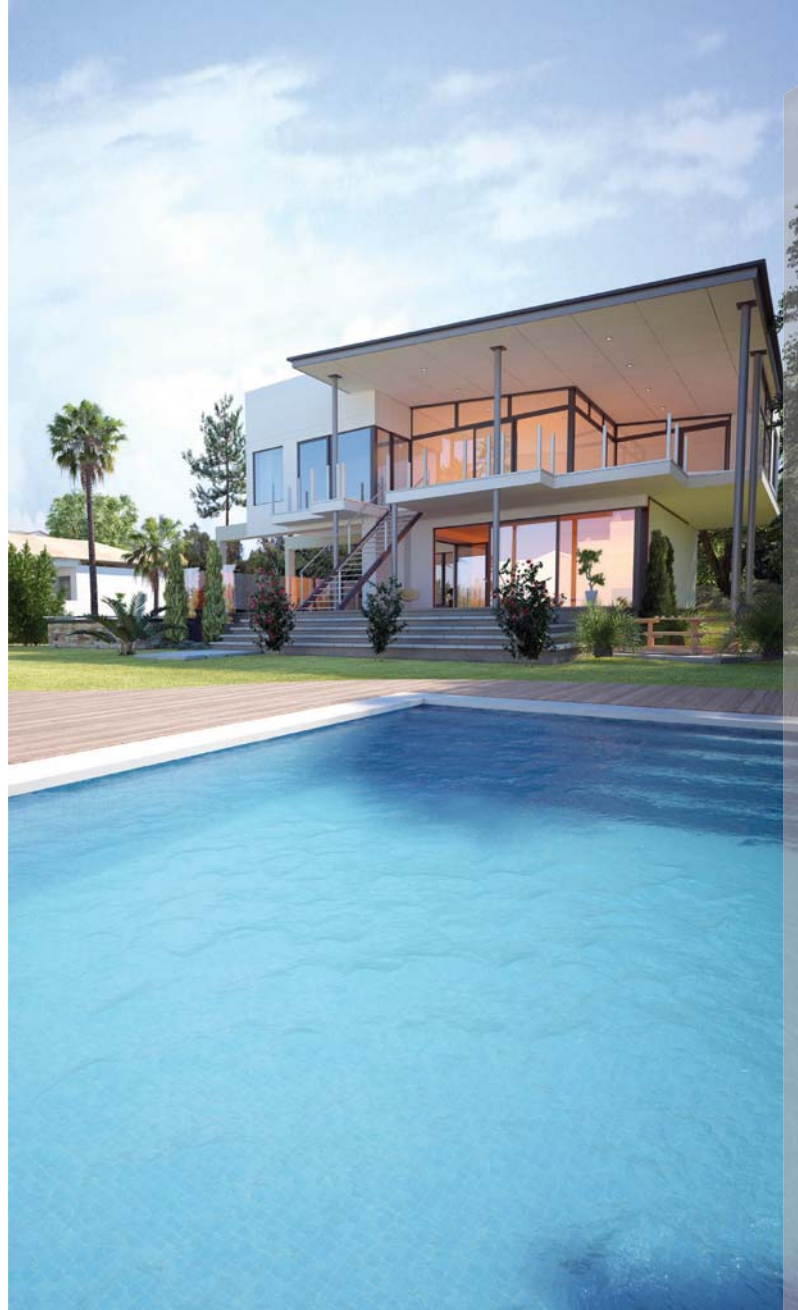

IT'S SALT...NATURALLY

Salt is natural. It is also economical and available everywhere. Salt is environmentally friendly and its conversion is energy efficient. When the salt passes through the AutoPilot® cell, it is converted to chlorine. After sanitizing the pool water, it turns back into salt, and the process begins all over again.

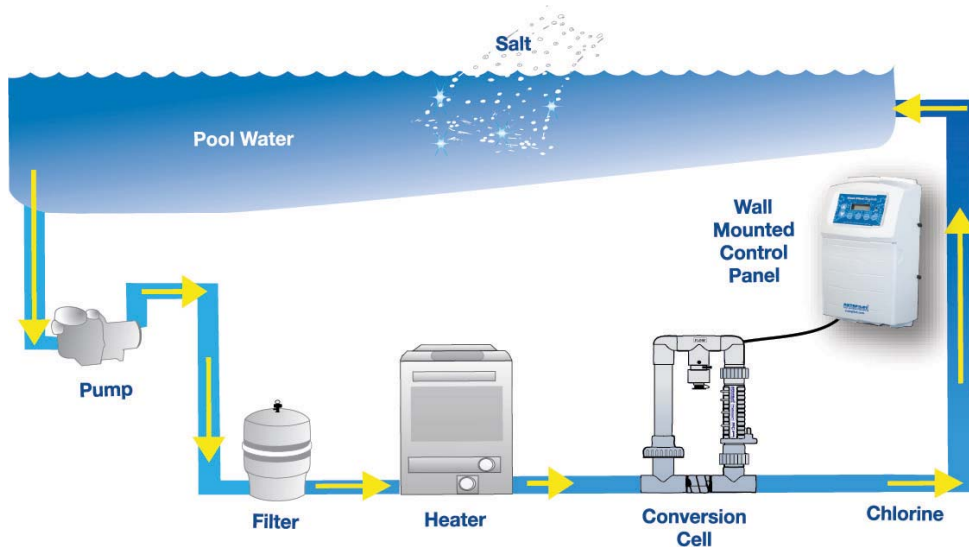

The best part is that the salt is at a much lower level than even contact lens solution, so there is no 'salty' taste to the water.

Electrolysis separates the molecules. We use the Cl (chlorine) and then it recombines back to NaCl (salt).

AUTOPILLOT®

Chemical Benefits of Salt Chlorine Generators

Easier to Balance the Water

Sanitizing Method				Direct Effect on Your Pool Water			
Common Name	Actual Chemical	pH	Recommended Test Frequency	pH	Total Alkalinity	TDS	Cyanuric Acid
Salt Chlorinators	100% Pure Sodium Hypochlorite	7.8	2x/month	= ↑	-	-	-
Liquid Chlorine	10% Strength Sodium Hypochlorite	13.0	2x/week	↑	↑	↑	=
Large or Small Tabs	Trichloro-s-Triazinetrione	3.0	1x/week	↓	↓	↑	↑
Granular Chlorine (HTH)	Calcium Hypochlorite	11.8	2x/week	↑	↑	↑	=
Granular Stabilized Chlorine	Sodium Dichloro-s-Triazinetrione	6.0	1x/week	↓	-	↑	↑
Bromine	Chlorine / Bromine Complex	4.6	1x/week	↓	↓	↑	n/a

Why Choose AutoPilot®?

- Patented bypass manifold
- Self-Cleaning & reliable
- Microprocessor technology
- Quality chlorine production cell
- Ecological product

- Patented temperature compensation
- Operates at all salt levels -
2,000 to 35,000 ppm - 2 to 35 g/L
- International support by
HornerXpress® Worldwide

- By-pass breveté
- Autonettoyant et fiable
- Microprocesseur
- Cellule produisant du chlore de qualité
- Produit écologique

- Système breveté de compensation
automatique de température
- Plage d'utilisation du taux de salinité de
2 à 35 g/L - 2000 à 35000 ppm
- Assistance internationale par
HornerXpress® Worldwide

- Tubo de desviación patentado
- Limpiador automático confiable
- Tecnología con microprocesador
- Celda de producción de cloro de calidad
- Producto ecológico

- Compensación de temperatura patentado
- Opera en todos los niveles de sal -
2 a 35 g/L - 2,000 a 35,000 ppm
- Soporte internacional por
HornerXpress® Worldwide
